

ASCOT

Features

1. The ASCOT saddle was our very first medical stool very similar to a horse saddle in that whilst sitting your pelvic position allows your spinal curves to balance more easily in proper alignment and reduces muscle strain. Science aside, this means a much more comfortable day at work.
2. High density comfort foam and vinyl for the "wipe clean" environment.
3. Backrest/torso arm and "hands free" foot operated seat height control are available as options.

Stool Functions

Seat Height

The height of the seat can be adjusted by pulling the seat height lever upwards and releasing to desired height while the occupant takes their weight off the stool.

Seat Tilt

The seat has 13 degrees of forward and 9 degrees of rearward tilt. Push the handle downwards to "free float" the movement and lift upwards to lock in any position.

Back Movement

The back has 10 degrees of forward movement and 5 degrees of rearward. Push the lever downwards to "free float" and lift upwards to lock in any position.

Back Height

The height of the back may be adjusted by loosening adjustment knob and sliding the flat bar up/down and held in place by hand tightening adjustment knob.
